

Maya Atwan - Software Developer

050-6160620 | maya.atwan.2000@gmail.com | [GitHub](#) | [LinkedIn](#)

Introduction:

Computer Science graduate with a strong foundation in algorithms, data structures, and object-oriented programming. Experienced in developing applications using Python, Java, and JavaScript through academic and personal projects. Motivated team player with strong problem-solving skills, eager to contribute to building scalable and impactful systems.

Education:

2022-2025: University of Haifa, B.Sc in Computer Science

GPA: 85

Final Project – Assignment Automation & GitHub Integration: Built a Django-based system used in real-world settings to automate assignment creation, generate Markdown files, and integrate with the GitHub API and GitHub Classroom. ([GitHub link available](#)).

2016-2018: High School – Majored in Computer Science and Physics.

Work Experience:

2024-2025: Teaching Assistant at the University of Haifa – Assisted in teaching the Discrete Math course to undergraduate students.

2023-2025: Mentor at QueenB – Mentored young women in JavaScript, HTML, and CSS through hands-on projects.

Hackathons & Projects:

2024: Software Engineering Course – Developed a client-server emergency data management system in a team of six using Java, implementing a GUI and applying the OCSF architecture for efficient communication.

2024: BeSafe Hackathon – Developed a React web application to promote online safety for young girls, focusing on user-friendly design and core functionality.

2023: Operating Systems Project – Implemented multithreaded programs in C using mutexes and semaphores, handling race conditions and analyzing thread scheduling and performance.

2023: Bootcamp at AppsFlyer & QueenB – Built a full-stack client-server application using Node.js, React, and PostgreSQL, including backend APIs, database design, and interactive frontend components. ([GitHub link available](#)).

Skills:

Python, JavaScript, C, C++, C#, Java, HTML, CSS, Bash, Django, React, Node.js, PostgreSQL, MySQL, Git, GitHub, Docker, Postman, AWS, REST APIs, RAG, Machine Learning, Deep Learning, Windows, Linux

Volunteering:

2023-2025: Perach – Mentored a student facing academic challenges.

2020-2021: Access For All Program – Provided assistance to individuals with challenging backgrounds.

Languages:

Arabic: Native, **Hebrew:** Near Native, **English:** Fluent.
